EDUCATION

Western Norway University of Applied Sciences - HVL   Bergen, Norway

Bachelor´s Degree in Information Technology   August 2021 – June 2024

Specialization: Web- and Mobile Technology   **GPA:** 3.8

Relevant Courses: Databases Systems, Programming and web applications, Software Architecture and Application Development, Advanced Web Applications, Mobile and Distributed Applications

EXPERIENCE

Stacc Escali   Bergen, Norway

Bachelor Thesis Project   January 2024 – June 2024

- Developed a fullstack solution using NextJS and ASP.NET to automate, optimize and organize the distribution of PowerBI reports, addressing the problem of a time-consuming manual process for Stacc Escali
- Operated in an Agile environment, participating in all stages of development from design to implementation, including front-end and back-end integration
- Designed the software architecture by leveraging academic knowledge and best practices observed at Escali
- Composed an academic report detailing the solution, including comprehensive documentation and a thorough description of the software architecture. The report received a top grade of A

Software Developer Intern   August 2023 – December 2023

- Developed a fullstack solution to manage customer orders and project deadlines using NextJS and ASP.NET, with a primary focus on front-end development
- Collaborated with UX designers to create a seamless and engaging user experience by designing and integrating Figma prototypes into the application
- Ensured data integrity and system functionality through close collaboration with back-end developers
- Gained valuable insights into the IT consulting role through direct engagement with developers

Oslo Kommune, Lambertseter Elementary School   Oslo, Norway

Substitute Teacher and School Assistant   August 2020 – June 2021

- Supported elementary school teachers at Lambertseter by providing targeted assistance to students needing extra attention and guidance
- Supervised and guided students with behavioral challenges to promote a positive learning environment and reduce disruptions
- Coordinated with educational staff to identify and assist students requiring specialized follow-up

Norwegian Armed Forces   Porsangermoen, Norway

Private   August 2019 – July 2020

- Served as a cavalryman and tracked vehicle operator in the mortar platoon for the Porsanger Battalion
- Independently maintained and performed minor repairs on my tracked vehicle, with full responsibility for the operational readiness of the vehicle
- Demonstrated discipline and resilience during intensive military exercises, cultivating a sustained will to persevere

TECHNICAL SKILLS

Fullstack Development: Proficient in building and integrating both front-end and back-end components

Design tools: Figma for creating wireframes and prototypes

Database management: Azure Data Studio and pgAdmin4 for database administration and management

Agile Methodologies: Scrum and Kanban for project management and team collaboration

Programming Languages: Java, C#, JavaScript, TypeScript, HTML, CSS & C++

Frameworks and Libraries: .NET, NextJS, SpringBoot, React, Android SDK & Android Jetpack

Testing: JUnit, xUnit & Postman

Languages: Norwegian, English, and conversational Swedish
